

Your internet has been **UPGRADED!**

Enjoy Faster Upload Speeds!

During our most recent maintenance window, we upgraded all of our internet packages to symmetrical speeds! **What does this mean?** For example, if you are on our Fiber 100 internet package, you used to receive 100 mbps download and 50 mbps upload. Now Fiber 100 customers are receiving 100 mbps download and 100 mbps upload. **Why is this better?** Mbsp (megabites per second) refers to the speed at which you retrieve or send information on the internet. If you are uploading photos to social media, gaming, working from home, streaming, or more, you could experience faster results. In our continuous effort to deliver the highest quality internet service to our customers, we hope you enjoy this free upgrade!
